

**SAVE TIME, ENSURE ACCURACY, AND GAIN
TRANSPARENCY OF THE BILLING PROCESS THROUGH
A COMPREHENSIVE MIX OF TECHNOLOGY, TOOLS,
AND DEDICATED TALENT**

HSI solutions allow clients to access and utilize vital data, reports, and trends. From tracking payer mix and performance, to collection rates and times, this powerful information can help organizations not only have confidence in their overall billing results, but also allow them to identify, analyze, and optimize challenges and opportunities as they arise.

Powering these advanced tools is a dedicated team of experienced billing professionals.

The HSI team works hand in hand with clients to provide vital insights, support, and responsive aid to their claims processing. To ensure accuracy and efficiency, HSI's easy to use electronic communications in combination with their reliable phone support provides clients with the access and help they need, when they need it.

**ACCESS THE EXPERTISE, GUIDANCE, AND PLATFORM TO IMPLEMENT
INDUSTRY LEADING BEST PRACTICES AND COMPLIANCE MEASURES**

Clients gain full access to the powerful knowledge and experience of HSI compliance, research, and policy teams. These teams not only watch over the entire process, giving clients the assurance that their billing process is in full compliance of Federal and State guidelines, but also monitor regulatory and industry trends and revisions to stay ahead of the ever evolving landscape.

HAVE CONFIDENCE IN YOUR BILLING

Built on decades of experience in the medical transport industry, HSI's solutions are designed for EMS companies nationwide to effectively implement and take advantage of cutting edge industry breakthroughs in order to realize improvements to their profitability while saving valuable time and resources. Backed by HSI's policy, research, and legal teams, HSI Air and HSI Ground equip medical transport companies with proven compliance measures and guidance.

HSI solutions are driven by forward-thinking technology tools, backed by a friendly and experienced team of experts. Once implemented, these solutions help EMS organizations increase revenue while optimizing key performance benchmarks, and gaining efficiencies and profitability.

EACH HSI CLIENT HAS THE TOOLS AND SUPPORT TO:

- Maximize Reimbursement while Optimizing Collection Times and Cash Flow
- Save Time, Ensure Accuracy, and Gain Transparency to the Entire Billing Process through a Comprehensive mix of Technology, Tools, and Specialized Talent
- Access the Expertise, Guidance, and Platform to Implement Industry-Leading Best Practices and Compliance Measures

MAXIMIZE REIMBURSEMENT PERCENTAGES WHILE OPTIMIZING COLLECTION TIMES

At its core, HSI's services are designed for the straightforward task of partnering with EMS companies to optimize collection times and to attain maximum revenue from their claims. Through their cutting edge technology and data driven Performance Platform, supported by an experienced and dedicated team, every aspect of HSI's solutions work together to deliver results that increase revenues.

DATA DRIVEN PERFORMANCE PLATFORM

The Performance Platform tracks and analyzes every claim, reimbursement, patient, payer, and recovery action while also identifying the most effective next steps for each claim and payer type based on proven historical data. Once the claim or payer type is identified, the platform then uses the information to forecast and prompt the right next steps at the ideal time to ensure maximum results.

The performance platform not only directs the best course of action for every claim at every step of the claims process, it's also continually learning and optimizing by collecting data from tens of thousands of claims and their performance.

TIME SAVING TECHNOLOGY

HSI empowers clients with a unique set of communications, tools, technology, and support to help not only optimize their collection rates and times, but also save time and resources. HSI's services combine technology and experience to spot discrepancies, errors, and issues before they arise to ensure claims move forward with maximum accuracy and efficiency.
