Par'-a-gon (n) – a model or pattern of excellence.

Just as important as what we do, or how we do it, is what we believe. We believe good people are what separate truly great companies from just good companies. We believe in bottom-up process improvement, meaning that it is the people performing the work that can actually contribute the most to improving the process. We believe that creativity should have no bounds or be hindered by the bureaucracy of a rigid chain of command. We believe that innovative technology should compliment a company's core strengths rather than being relied upon as the company's core strength. We believe that customer relationships should be a partnership with the common goal of continually looking for ways to improve upon the customer experience. Now on to what we do!

Paragon Billing - Our friendly, professional staff will submit your claims to insurance companies, track payments, and work directly with insurance companies to resolve unpaid claims. We are available to you and your clients by phone, as needed.

Paragon EHR - Our web-based EHR was designed specifically for psychologists, social workers, psychiatrists, marriage and family therapists, and other mental health practitioners. Customizable templates make charting simple.

Paragon Calendar - Designed with your practice schedule in mind, the web-based appointment calendar has no learning curve. Simply add an appointment and after the session, billable charges are generated directly from your calendar.

“Simple Can Be Harder Than Complex: You have to work hard to get your thinking clean to make it simple. But it’s worth it in the end because once you get there, you can move mountains.” –Steve Jobs

Our passion is to create refreshingly simple products that you want to use, not because you have to but because they make your life easier.

- We’re laser focused. For over 10 years we’ve focused exclusively on creating mental health solutions. Our focus has been rewarded with hundreds of loyal customers.
- We’re not fans of bloated anything. We spend a tremendous amount of time with everything we design to make it the most useful to the user in the simplest way possible.
- We don’t use off-the-shelf billing software. Instead, we developed our own powerful proprietary billing software and have continuously improved it over the years based on practitioner and biller feedback.
- We created our own web-based EHR software not because we love creating software, although we do love creating great software, but because that’s what our clients needed.

Laser Focus + Refreshingly Simple Products = Better Results
