

## **Syncordia Announces “Claim Editor” another product of the Syncordia Cloud/Syncordia Platform**

**TORONTO, ONTARIO – June 6, 2016 – Syncordia Technologies and Healthcare Solutions, Corp. (TSXV: SYN)** (“Syncordia” or the “Company”) today announced the implementation of its proprietary Claim Editor, a workflow automation tool designed to minimize errors while maximizing payment rates in submitting medical billing claims and decreasing the time to input claims by more than 2.5 times.

The Claim Editor, is one in a series of “Syncordia Cloud/Platform” forthcoming products. Michael Franks, CEO of Syncordia says “Claim Editor (patent pending) is a revolutionary claim intake module that will coordinate and facilitate the input from client systems into various billing systems. This intake tool will create efficient, low touch claim entry presentation workflow in the market, while simultaneously ensuring the claim records it creates are error free. For Syncordia clients this translates into the maximum reimbursement and payment speed while increasing its revenue streams for its portfolio companies. We are also now laying the ground work for a SaaS offering for the Syncordia Claim Editor”

Chris Martin, Chief Strategy Officer of Syncordia says “Creating medical claims for billing is a labor intensive process and can be prone to errors. Typically, paper documents have to be manually scanned, viewed, and manually entered into a billing system, after the records have been manually quality assured and eligibility verified. Electronic records, especially NEMESIS-compliance files can be sent into the billing systems but the mapping is also labor intensive and dependent on the billing systems used.” The Claim Editor addresses both of these short comings with:

- Integrated Eligibility Verification through the Claim Editor
- Automated claim entry directly to the billing systems
- Efficient UI and flow
- Intelligent rule engines with on-the-screen auto-QA and alerts to minimize data entry and maximize pay rate
- Automated data imports

Full features of our Claim Editor will include:

- NEMESIS and non-NEMESIS file automated import
- Billing System Independent
- Automated Eligibility Check
- Automated QA and Onscreen Alerts
- Role-based Engine and Workflow
- Integration with Document Management System

Andy Tran, Chief Technology Officer of Syncordia says “Claim Editor release is consistent with Syncordia’s vision of full proprietary ownership of the revenue cycle management software supply chain for the benefit of customers and shareholders.”

**About Syncordia Technologies and Healthcare Solutions, Corp.**

We are a technology enhanced revenue cycle management (“RCM”) company focused on underserved niche segments of the healthcare industry. We are focused on using our proprietary software suite as an accelerator for growth. We are building a diversified software and services business by consolidating healthcare billing providers. Our growth strategy is to acquire RCM businesses with and without software and, improve their profitability by increasing revenues and operating efficiencies using our software, and in time, commercializing the Syncordia Cloud, our cloud-based software offering, to provide customer demanded turn-key solutions from a single provider and to address compelling RCM market opportunities.

Neither the TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in policies of the TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of this release.
